UXPin

Programming

HTML
CSS
JavaScript
jQuery
Java
AngularJS
Bootstrap
Spring MVC

Projects

Designing Food Science blog, QA website

Entrepreneurial Project | Jun 2018 - Jul 2018

- Designed QA web app for Food Science students
- My responsibilities included conducting user research, stakeholder interviews, user focus groups, card sorting, competitor analysis, designing use cases, information architecture, wireframing design ideas using proto.io.

Redesigning Indeed's website and mobile app

Personal Project | Jun 2018 - Jul 2018

- Conducted user interviews, surveys, competitor analysis
- Conducted open and closed card sorting (In-person and remote)
- Built IA strategy, added new features, redesigned IA for web and mobile app for jobseekers
- Designed hi-fidelity prototypes using proto.io, conducted in-person usability tests.

Vite Visual Search Engine Mobile App – UX Design

BA Course Project | Mar 2018 - Apr 2018

- Analyzed, documented business, user goals for the app
- Conducted user interviews, designed UML diagrams
- Prototyped high fidelity wireframes using Sketch
- Conducted usability testing with 10 users assigning basic tasks and iterated design process

CAVAS Health Care System Design

UX Course Project | Nov 2017 – Dec 2017

- I created digital experiences for appointment scheduling, online health reports for patients.
- I wore many hats—conducting user research, sketching design ideas, wireframing, prototyping the design in Axure for web, mobile and android watch.

Education

Master's in Information Systems

Northeastern University | Sept 2016 – May 2018

Bachelor's in Computer Science & Engineering

Jawaharlal Nehru Technological University | Sept 2012 – May 2016
